

Performance Track Member BMW used landfill gas to generate power and supply itself with hot water.

That's Hot!

In their Spartanburg, South Carolina production facility, BMW substituted landfill gas to power its facility's turbines for electricity and hot water. They decreased their energy costs and prevented the release of more than 59,000 tons of carbon dioxide. The company benefited. The environment benefited.

Put your company on track—you'll be amazed at your performance.
